

A is 24% of B.	
A is 7.5% of B.	
A is 235% of B.	
A is p% of B.	
A is 24% greater than B.	
A is 7.5% greater than B.	
A is 235% greater than B.	
A is p% greater than B.	
A is 24% less than B.	
A is 7.5% less than B.	
A is p% less than B.	

240 is ____% greater than 190.

360 is ____% greater than 100.

58 is ____% less than 84.

1.5 is ____% less than 2.1.

A % change is an exponential model. Please interpret the models below.

Penguin population $y = 500(1.085)^{\frac{x}{4}}$ (Note: x is # of years)

Deer population $y = 200(0.84)^{2x}$ (Note: x is # of years)
