

Question 1

75 is $p\%$ less than 156.25 . What is the value of p ?

Question 2

The numbers a and b are both positive constants.

The number a is 440% of the number b .

The number b is 90% more than 90.

What is the value of a ?

Question 3

The numbers a and b are both positive constants.

The number a is 36% less than the number b .

16 is 0.2% of the number a .

What is the value of b ?

Question 4

The numbers j , k , and l are all positive constants.

The number k is 92% less than the number j .

The number k is 110% more than the number l .

If j is $p\%$ of l , what is the value of p ?

Question 5

The numbers s , t , and u are all positive constants.

The number s is 40% of the number t .

The number t is 65% more than the number u .

If s is $p\%$ less than u , what is the value of p ?

Question 6

The numbers a , b , and c are all positive constants.

The number a is 16% less than c .

The number b is 375% of the number c .

If a is $p\%$ less than b , which of the following is closest to the value of p ?

- A) 22.4 B) 77.6 C) 346.4 D) 446.4

Question 7

The amount of ozone in the stratosphere in 2020 was 0.74 times the amount of ozone in the stratosphere in 2015.

If the amount of ozone in the stratosphere in 2015 is $p\%$ **of** the amount of ozone in the stratosphere in 2020, what is the value of p , to the nearest whole number?

If the amount of ozone in the stratosphere in 2015 is $p\%$ **more than** the amount of ozone in the stratosphere in 2020, what is the value of p , to the nearest whole number?

Question 8

The number a is 2,685% more than the sum of the positive numbers b and c , and b is 34% of c . What percent of a is b ? Pick the closest answer.

A) 0.62%

B) 0.74%

C) 0.91%

D) 1.10%

Question 9

The numbers a , b , and c are all positive constants, where $a > b$

The number c is 1,458% more than the positive difference between a and b , and a is 262% of b .

If c is $p\%$ more than b , what is the value of p , to the nearest whole number?

Question 10

The value of a video game console increased by 200% from the end of 2015 to the end of 2016. The value of the console then decreased by 45% from the end of 2016 to the end of 2017. Finally, the value of the console increased by 8% from the end of 2017 to the end of 2018. What was the net percentage increase in the value of the video game console from the end of 2015 to the end of 2018?

- A) 78.2% B) 118.8% C) 163.0% D) 253.3%
