

## Practice Sets: All Chapters (answers pp. 219-225)

### Set 1 (answers p. 219)

1. While ancient cities are often imagined to have been more sustainable than modern ones, the tension between urban life and the environment has deep roots. \_\_\_\_\_ the development of the ancient city of Akko six thousand years ago transformed dense coastal forests into a dry, shrubby grassland.

Ⓐ However,

Ⓑ Hence,

Ⓒ Furthermore,

Ⓓ For example,

2. In the eyes of the colonial British administration, Samuel Adams was an outlaw. \_\_\_\_\_ he often behaved like one: he erased his fingerprints, refused to copy his letters, and destroyed piles of his papers to prevent them from falling into enemy hands.

Ⓐ Specifically,

Ⓑ Indeed,

Ⓒ Nevertheless,

Ⓓ On the other hand,

3. Because the wild ancestors of modern felines never lived in social groups, cats are genetically predisposed to be independent. \_\_\_\_\_ during the domestication process, they developed the ability to form social relationships with other members of their species as well as with people.

Ⓐ Moreover,

Ⓑ Accordingly,

Ⓒ For instance,

Ⓓ Still,

4. Recent research suggests that short-term training in self-regulation—the ability to manage attention, emotion, and impulses, as well as to persevere in achieving \_\_\_\_\_ have long-term effects for children. A recent study found that children who participated in a single unit on self-regulation were still experiencing positive effects more than three years later.

Ⓐ goals, can

Ⓑ goals can

Ⓒ goals—can

Ⓓ goals can:

5. In the winter of 1885, archaeologists in Greece discovered a unique assembly of figures. Buried in 480 BCE, they had been spared 2,500 years of vandalism. Researchers were astonished—not only because of the importance of the works, but also because of the excellent preservation of \_\_\_\_ original surface paint.

Ⓐ their

Ⓑ its

Ⓒ his or her

Ⓓ one's

6. While bees can survive in the dark, they prefer to be in the sunlight. The shaded interiors of woodlands are therefore considered a poor habitat for bees. New research shows that many types of bees are active high above the \_\_\_\_ suggests wild bees are just as happy in treetops as they are among the flowers at ground level.

Ⓐ trees, however; a discovery that

Ⓑ trees, however, a discovery that

Ⓒ trees, however, a discovery, that

Ⓓ trees, however, this discovery

7. Adult height is primarily determined by the information encoded in people's DNA. These correlations are not exact, however. Traditionally, the role of genetics in the process of growth from tiny infant to adults \_\_\_\_ a complex and poorly understood area of human biology.

Ⓐ are

Ⓑ have been

Ⓒ has been

Ⓓ having been

8. John F. Kennedy was the first U.S. president to hold televised press conferences, and he used the new medium of television to great effect. \_\_\_\_ his humor, charm, and wit allowed him to connect with his audiences.

Ⓐ A natural in front of the camera,

Ⓑ As a natural in front of the camera,

Ⓒ Kennedy was a natural in front of the camera,

Ⓓ Kennedy was a natural in front of the camera, and

9. While researching a topic, a student has taken the following notes:

- Game shows became an important part of American popular culture in the 1950s.
- Viewership of high-stakes games such as *The \$64,000 Question* quickly increased.
- In 1959, many of the higher stakes game shows were found to be rigged.
- Daytime game shows were played for low stakes, but in the evening, contestants could win thousands of dollars.
- By the early 1960s, viewership had declined significantly.

The student wants to emphasize the rapid rise and fall of game shows' popularity. Which choice most effectively uses relevant information from the notes to achieve this goal?

Ⓐ During some game shows, contestants competed against each other for enormous sums of money.

Ⓑ As a result of scandals involving game shows in the late 1950s, viewers began to lose interest in these programs.

Ⓒ Although game shows attracted a large following in the first few years after they were created, viewership decreased dramatically only a decade later.

Ⓓ In the mid-twentieth century, game shows reflected the American public's growing reliance on television for entertainment.

10. While researching a topic, a student has taken the following notes:

- The carbohydrates in honey can quickly be converted to energy.
- Ancient Greeks and Egyptians used honey in ointments for skin and eye problems.
- The medical device company Derma Sciences sells honey-coated bandages.
- Honey does not cause blood sugar to spike the way other types of sweeteners do.
- Today, raw honey is used to reduce seasonal allergies.

The student wants to emphasize honey's medicinal properties. Which choice most effectively uses relevant information from the notes to achieve this goal?

Ⓐ Unlike other types of sweeteners, honey allows a person's blood sugar to remain stable rather than rising sharply.

Ⓑ Honey was commonly used as a sweetener in ancient times, before the cultivation of sugarcane began.

Ⓒ Honey contains carbohydrates that can provide a quick boost of energy.

Ⓓ For thousands of years, people have used honey to treat skin problems and relieve allergy symptoms.
